

# Help us fight infection!

Please wash your hands or use alcohol based hand gel on the way into and out of the facility. If visiting more than one resident, perform hand washing in between each individual resident visit.

Leave infections at home. Do not visit residents if you have been sick or have had flu-like symptoms in the last two days or if you are feeling ill.

Please use respiratory etiquette by coughing and sneezing into your elbow or tissue. Discard of dirty tissues into the garbage can.

If you have any questions about general infection control practices for healthcare settings, contact the Utah Department of Health, Bureau of Epidemiology.
